EXPERIENCE

Web Development
Fiverr.com (level Two)

📅 August 2019 – present   📍 Remote

- Worked as full-stack WordPress web developer.
- Developed a fully functional regular, responsive WordPress e-commerce website.
- Technology used for backend: PHP, MySql.
- Technology used for frontend: HTML, CSS, Bootstrap, Jquery, Tailwind CSS.

PROJECTS

Develop Smart Resume Analyzer app
Artificial Intelligence Project

📅 March 2023 – May 2023

- I have developed a smart system that analyzes the user's resume and provides the resume scores and recommended jobs.
- The second version of the system is used by HR to filter the CV according to their Job criteria and create a structured CSV file.

Develop an easy Attendance Android Application
University Project

📅 March 2023 - April 2023

- Develop a Complete Smart Android Application that gives the ease to mark attendance through the app.
- The main advantage is that the students can also use app to see their attendance and see the attendance percentage for the whole semester.

Develop an E-commerce store using Next.js
Self- learning Project

📅 February 2022 – August 2022

- Used React.js, and Advance JavaScript Skills to create a hands-on UX Experience.
- Used Tailwind Css for UI and jwt Token, Encrypted password to make Website Secure.

Newscast Website with Dashboard using PHP and Mysqli
University Project

📅 December 2021 – January 2022

- Develop a Newscast website with an Admin pannel to Update the website with secure login system.
- I used PHP along with Mysqli database for creating Backend and Bootstrap to create UI of Website.
